

## Orthotics and Prosthetics

The MossRehab Regional Amputee Center is unique in its special onsite prosthetics provider, Allied Orthotics and Prosthetics.

No other facility in the area has the capability to fabricate and modify prostheses on campus. This gives us the tremendous benefit of having a prosthetic limb maker available during all working hours for quick, convenient service.

It also allows the prosthetic maker to be part of the rehabilitation team. Our certified practitioners work closely with the physicians and therapists to achieve the best results for our patients.

Each professional is able to teach and learn from one another. Consequently, the dedicated therapists at MossRehab are very knowledgeable about prosthetics, and the prosthetists understand how changes to the prosthesis truly affect a person's ability to function.
