Optimizing Neurologic Rehabilitation Outcomes: Pushing Practice Forward

**Friday, November 6 and
Saturday, November 7, 2015**

Featured Speakers:

Leonardo G. Cohen, MD, Chief, Human Cortical Physiology and Stroke Neurorehabilitation Section, National Institute of Neurological Disorders and Stroke, National Institutes of Health.

Thomas E. Strax, MD, Emeritus Professor of Rehabilitation Medicine, New Jersey College of Medicine and Dentistry.

Intended Audience:

This activity has been designed for rehabilitation physicians, nurses, case managers, social workers, physical therapists, occupational therapists, speech language pathologists, and other healthcare professionals.

Course Description:

This two-day conference will explore three key forces that are driving the evolution of neurologic rehabilitation practice: emerging science, developing technology, and healthcare reform.

Expert speakers, nationally recognized in their fields, will present the latest developments in the lab, the clinic, and the healthcare environment. General sessions will be followed by concurrent mini-courses that focus on applying research or regulatory information to clinical practice. Each participant will have the opportunity to choose offerings from a wide selection of topics.

A formal invitation will follow. Check back with www.MossRehabConference.com as information develops.
