

MossRehab Occupational Therapy Fellowship in Physical Rehabilitation

About the Fellowship

The fellowship program at MossRehab begins in July of each year and runs for 53 consecutive weeks. The program provides an intensive, 1-year experience combining clinical and didactic learning opportunities.

The foundation of the program is over 250 hours of one-on-one mentoring with expert clinicians at MossRehab. This occurs concurrently with clinical practice as a treating therapist, as the fellow moves through several clinical rotations within the diagnostic services at MossRehab. The fellow will also receive over 100 hours of didactic instruction following a curriculum designed to comprehensively address occupational therapy practice in physical rehabilitation.

Additional components of the program include structured learning experiences in areas related to clinical specialty evaluations, teaching, support groups, research, and scientific inquiry.

Why Choose MossRehab?

MossRehab has a long history of providing outstanding care to individuals with physical disabilities. This rich, dynamic clinical environment allows access to experienced occupational therapy practitioners as well as other member of the transdisciplinary care team.

MossRehab offers multiple CARF-accredited treatment programs and is one of the nation's top ten rehabilitation hospital, as listed by US News & World Report. Most importantly, MossRehab provides comprehensive services with superior outcomes for our patients across a spectrum of diagnoses.

Application Process

Application announcements are made in December.

Fellowship Requirement

Occupational Therapy licensure in the state of PA is required before entering the program.

One year of clinical experience is preferred.

Applicants should plan to apply for Board Certification in Physical Rehabilitation following their fellowship year, per the requirements of AOTA.
